This survey was made with a C.L.Berger & Son transit with horizontal limb 64 ins. diam., with vertical circle 5 ins. diam., each having two opposite verniers; the verniers read to one ... minute of arc.

The instrument was in good condition at the time of the survey and all adjustments were in good order.

. All azimuths in this record were determined by the method of deflection angles referred to the meridian determined by the following observation.

Friday, February 3, 1956, at Cor. No. 2 Ajo Peak No. 2 lode, in latitude 32°20'42" and longitude 112°53'23" W., I made a series of observations upon the sun for azimuth at approximately equal time intervals. Three each with the telescope in direct and reversed positions, bisecting the sun and reading the horizontal angle counterclockwise to the sun.

. delb . Mean time of observation, b .and & 105th meridian standard time Declination of the sun at mean time of observation=16°39'57" S. Mean observed vertical angle to, sun's center . =32°37'00" Mean horizontal angle from reference point =152°46' True bearing to reference point mixed redio - N.63°21'40" W.

The lines were measured with a Keuffel & Esser steel tape 300 feet in length, the first foot graduated to tenths and hundredths; and a 100 foot Lufkin steel tape, graduated to feet, tenths and hundredths; both tapes were compared with a standard and were correct at the time of the survey.

All lines and connections of this survey were run by direct

The magnetic declination observed at each corner of this. 13 0.0 Road, bears north. Ist. 1618 late with Cor. Wo. 2, identical with Cor. Wo. 1, Aja Peak Wo. 2 lode street, and SE. cor. of the unsurveyed Independence Lo. 2

		An interest in a common improvement described as follows.
	(12.13)	A drill hole, 9 ins. diam., which bears N. 86°45' E., 550 ft. from Cor. No. 1 Ajo Peak No. 21 lode, 920 ft. deep.  Total value, \$8,727.00  Value of 1/17 interest \$513.35
		(GEORGE )
		This improvement is in the course of construction for the development of the seventeen lodes of this survey, which are all the lode claims owned in common within the range benefit of said improvement.
		The surface is generally level, rising gradually to the south from this drill hole and affords the most practical and economical means of developing each of the stated lodes at depth.
		Five hundred dollars or over has been expended in this improvement in such a manner as tends to the development of each lode of this survey subsequent to its location and to the time since which common ownership and contiguity have prevailed; therefore an undivided 1/17 interest in its value is hereby credited to each of the said lodes.
		No portion of, or interest in, this improvement has been credited heretofore as patent expenditure to any other lode claims.
		OTHER IMPROVEMENTS
		A shaft, the center of which bears S. 44°30' E., 670 ft. from Cor. No. 4 Ajo Peak No. 2 lode; 4x6 ft., 4 ft. deep. (caved)
		A shaft, the center of which bears S. 40°30' E., 660 ft. from Cor. No. 4 Ajo Peak No. 2 lode; 4x6 ft., 3 ft. deep. (caved)
		A shaft, the center of which bears S. 42°30' E., 580 ft. from Cor. No. 4 Ajo Peak No. 2 lode, 4x6 ft., 5 ft. deep. (caved)
		A shaft, the center of which bears S. 39° E., 585 ft. from Cor. No. l. Ajo Peak No. 2 lode; 6x6 ft., 4 ft. deep. (caved)
		A shaft, the center of which bears S. 40°E., 350 ft. from Cor. No. 3 Ajo Peak No. 7 lode; 4x8 ft., 3 ft. deep. (caved)
		A shaft, the center of which bears S. 44°30' E., 215 ft., from Cor. No. 1 Ajo Peak No. 12 lode; 4x6 ft., 12 ft. deep.
		A shaft, on line 1-2 Ajo Peak Nos. 11 and 12 lodes, bears S. 26° 38'20" W., 71 ft. from Cor. Nos. 1; 6x10 ft., 8 ft. deep.
		Claimant of each unknown.
